Suzhou Pinnacle Electronic Co., Ltd. is a high-tech enterprise that integrates research, development, production, and sales. It is a part of a strategic alliance of 15 famous factories in China and has strong research and development capabilities, a powerful product line, and a unique POS concept. Since 2010, Suzhou Pinnacle has developed into a 5000m<sup>2</sup> factory in Suzhou High-tech Development Zone, producing more than 50,000 touch screen POS cash registers, AI POS Scales, AI barcode label scales, Android POS, and payment POS each year. Its products are designed with a unique and innovative Suzhou style. In China, there are over 300 authorized and established ZHONGJI POS brand dealers nationwide. In overseas, the company relies on its high-quality products to expand and export to countries such as the United States, the United Kingdom, Turkey, Australia, New Zealand, South Korea, Singapore, and South Africa, where it is highly praised by customers.

Suzhou Pinnacle currently owns two brands: "ZHONGJI" and "ANYPAY", and over 50 series of products such as commercial smart touch screen POS, AI POS Scale, barcode label scales, mobile POS machines, face payment cash registers, self-service ordering kiosk, POS software systems, etc. In recent years, the company has adhered to the "pursue leading, never stop" technology route and relied on its first-class R&D team to obtain multiple patents for inventions, designs, and practical new types in the field of POS and POS Scale. Its products have obtained national 3C product certification, CE certification, FCC certification, KC certification, SASO certification, and passed ISO9001 quality management system certification.

Our business philosophy is "working together, progress together", and it provides the market with more intelligent POS system products and more personalized services, creating a bright future for the POS industry together!

A9

# ZHONGJI TOUCH SCREEN POS

Smart Face Payment POS System  
A9 Series

Taihu stone has been praised by poets since tang dynasty. The product design of A9 is based on the geometric shape of the Suzhou Taihu stone. It has gone through the vicissitudes of life and is naturally natural! The classic Chinese imperial garden and private garden (Humble Administrator's Garden) stone use material. Taihu stone has four characteristics of great beauty: empty, transparent, wrinkled and leaky. ZHONGJI products always adheres to the suzhou style!

The product seems to be separated, but in fact it is integrated. The free combination of multiple modules such as POS, printer, face payment, 2D scanner, MSR, RFID card reader etc, provides merchants with a more beautiful and more user-friendly POS system artifact.

# ZHONGJI TOUCH CASH REGISTER

Classic Original-Design Model  
A7 Series

The Jiangnan style, white walls and green tiles, perfectly combines the intelligent and integrated Suzhou-style design, resulting in the unparalleled A7 series. The collection of each functional module is a leap forward. ALL IN ONE design for checkout, card reader, printing, and check verification, provides a new way for stores to quickly check out. The A7 presents itself with a fashionable and intelligent posture and is effortlessly adaptable to the changes in business.
